SUMMARY

Experienced IT professional proficient in optimizing data accuracy and efficiency across AI/ML, Networking, Software Development, and System Administration. Skilled in leading information security policy design and implementation to meet industry standards. Specializes in scalable cloud architecture development, leveraging diverse technologies and DevOps practices for enhanced performance. Excels in fast-paced environments, adept at solving complex technical challenges and driving business agility through networking technologies and software engineering languages.

SKILLS

Skills: Python, Development Operations (DevOps), Microsoft Azure, JavaScript, Terraform, Ansible, Java, C/C++, Linux/Unix, MySQL, .NET, PowerShell, SQL
Languages: Spanish, Swahili

PROFESSIONAL EXPERIENCE

ECPI University   **Raleigh, NC, USA**
Information Security Technology   *January 2022 - Present*
- Contributed to the development and maintenance of the university's web presence, ensuring a seamless user experience for all visitors
- Implement network security and policies Maintained firewall measures Routine testing of intrusion and detection systems Collaborated with cross-functional teams to evaluate, test, and integrate new technologies, playing a crucial role in driving the digital transformation of the university
- Participated in the development and implementation of data analytics and reporting systems for the university, providing key insights and recommendations to drive decision making and continuous improvement
- Conducted public awareness and education on emerging technologies, cloud computing and cybersecurity concerns.

AIMIS   **Raleigh, NC, USA**
Artificial Intelligence Assistant   *January 2022 - Present*
- Drive the development and implementation of AI and machine learning models for the company's products and services, leveraging best practices in data collection, preparation, and analysis to optimize accuracy and efficiency
- Lead the design and implementation of the company's information security policies and procedures, ensuring alignment with industry standards and best practices
- Develop and maintain the company's data infrastructure, ensuring scalability, reliability, and performance for the company's products and services

Oceanic Trucking   **Raleigh, NC, USA**
Information Technology Specialist   *January 2019 - January 2022*
- Diagnosed and resolved a range of software, hardware, and connectivity issues
- Switching and routing Provided technical training on hardware/software to end-users Provided clients with information on available upgrades and troubleshoot computer related problems for internal and external clients Responding to daily IT calls/tickets Installing and maintaining both Windows and Unix Operating Systems Diagnosing Network and Telecommunications Device Configuration Issues

EDUCATION

ECPI University   **January 2022 - November 2024**
Bachelor's, Computer Science   *GPA: 4*
- 2023 Ethical Hacking Club Captain
- Data Science Project: AI-Infused Penetration Testing
- Capstone Project: Automating Malware Classification with Deep Learning
- Certified Information Security Systems Professional Training
